

How much longer did MAXLIFE last than the well known brands?

The AA Alkaline Battery Test

DIGITAL CAMERA TEST ON TEN BRANDS OF AA ALKALINE BATTERY

INDEPENDENTLY TESTED BY

Test Method and Acceptance Criteria

AA discharge performance of primary batteries is specified in IEC 60086-2:2011 and is conducted in accordance with an application test, which is to simulate an application of Digital still camera. Nine samples are discharged by a 1500/650/0mW power drains load 5 minutes per hour and 24h per day, until end-point voltage reached to 1.05V. The minimum average duration (MAD) of the test is 40 pulses.
