Experience High Performance Data Throughput

With the Link Aggregation enabled, Synology RS2212+/RS2212RP+ delivers an average 200,73 MB/sec reading speed under RAID 5 configuration in a Windows environment, and 194,32 MB/sec writing[1]. Synology RS2212+/RS2212RP+ bring you the high performance that your data-intensive applications demand for a storage system, and offer the ability to scale the storage capacity.

High Reliability for Critical Business Applications

Businesses need a strong foundation to face mission-critical tasks. Synology RS2212+/RS2212RP+ deliver high data availability to ensure access when it's needed. The 2 LAN with failover support and hot-swappable drives will ensure continual service uptime should the drives need replacement or the unexpected LAN failure.

CPU is the heart of any system, and RS2212+/RS2212RP+ incorporates a passive cooling structure to avoid the dependency of a dedicated processor cooling fan, and mitigate any critical point of failure. When system detects fan fails, the built-in redundancy mechanism will spin up the functional fan(s) to properly ventilate the system, and support continuous operations until the replacement fan arrives. Therefore, potential system damages are minimized and system availability is maximized.

Robust & Affordable Scalability Up to 66 TB

When the storage capacity of the Synology RS2212+/RS2212RP+ is nearing its limits, it can easily be expanded by the Synology RX1211/RX1211RP. The Synology RS2212+/RS2212RP+ securely connect to the Synology RX1211/RX1211RP with specially-designed connection cable which carries SATA signals to ensure maximum throughput. The Synology RX1211/RX1211RP can directly expand the existing storage on the Synology RS2212+/RS2212RP+ to a maximum 66 TB capacity.

Fit to Business Environment

Windows ADS integration allows the Synology RS2212+/RS2212RP+ to quickly and easily fit in an existing business network environment with no need to recreate users' accounts on the Synology RS2212+/RS2212RP+. The User Home feature minimizes the administrator's effort in creating a private shared folder for a large amount of users.

Windows ACL support on RS2212+/RS2212RP+ provides much finer-grained access control and efficient privilege settings, allowing IT staffs to set up privileges to files and folders on RS2212+/RS2212RP+ through their familiar Windows user interface. The privileges set on Windows ACL will be applied to all access entries, including AFP, FTP, File Station, NFS and WebDAV. The secure privilege offers IT staff peace of mind, no worries about any loopholes.

iSCSI and Virtualization Ready

With the iSCSI support in DSM, the Synology RS2212+/RS2212RP+ provides a seamless storage solution for virtualization servers, such as VMware, Hyper-V, and Citrix. It is the ideal alternative to SAN solution for businesses. Affordable and cost-effective, iSCSI allows SMB users to consolidate storage into data center storage arrays while providing hosts with the illusion of locally-attached disks.

Full-featured Business Applications

The Synology RS2212+/RS2212RP+ runs on the renowned operating system, Synology DSM, offering comprehensive applications and features designed specifically for SMBs. Comprehensive network protocol support assures seamless file sharing across Windows, Mac®, and Linux® platforms.

Internet file access is simplified by the encrypted FTP server and the web-based file explorer, Synology File Station. HTTPS, firewall, and IP auto-block support ensure file sharing over the Internet is protected at a high security level.
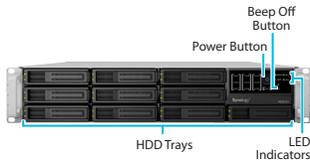

A wealth of additional features allows the Synology RS2212+/RS2212RP+ to replace several pieces of network hardware. Synology Web Station with support for PHP/MySQL® content allows for the hosting of up to 30 websites on a single Synology RS2212+/RS2212RP+. Synology Surveillance Station offers a centralized interface to safeguard the office environments by deploying IP cameras throughout the network. RS2212+/RS2212RP+ features a mail server that can work with mail clients such as Mac Mail or Windows Outlook®, and the USB printer sharing capability minimizes businesses' printing cost by sharing printing resources throughout the office.
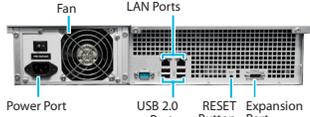

Energy Efficient Design

Synology RS2212+/RS2212RP+ is designed and developed with energy efficiency in mind. Compared with the average storage server counterparts, RS2212+/RS2212RP+ consume a relatively low amount of power. The support of Wake on LAN/WAN and scheduled power on and off can further reduce power consumption and operation cost. HDD hibernation can be configured to take effect automatically when the system has been inactive for a specified period of time. This not only saves energy but also extends the lifespan of the hard disks.

All Synology products are produced with RoHS compliant parts and packed with recyclable packing materials. Synology acknowledges the responsibility as a global citizen to continually work to reduce the environmental impact of every product produced.
